

Strategische
Partnerschaft

Sensorik

The logo for 'Sensorik' features the word in a bold, blue, sans-serif font. To its left, the words 'Strategische Partnerschaft' are stacked vertically in a smaller, lighter blue font. To the right of the word 'Sensorik', there is a graphic consisting of two concentric, light blue circular lines that are partially broken, suggesting a signal or sensor.

Your Regional Network
for the Sensor Industry

A white silhouette of the state of Bavaria is centered on the right side of the image. A network of nodes is overlaid on this map. A central node, located in the middle of the state, is a dark blue circle with three concentric white lines around it, resembling a signal or sensor icon. From this central node, thin white lines radiate outwards to approximately 15 other nodes. These peripheral nodes are represented by small blue circles of varying sizes, scattered across the geographical outline of Bavaria. The background of the entire image is a dark blue, textured surface with a grid of circular patterns, giving it a technical or circuit-like appearance.

Sensor Technology – Driving Force for Future Technologies

Megatrends such as machine learning and the (industrial) Internet of Things would not be feasible without sensors, the "sensory organs" of technology.

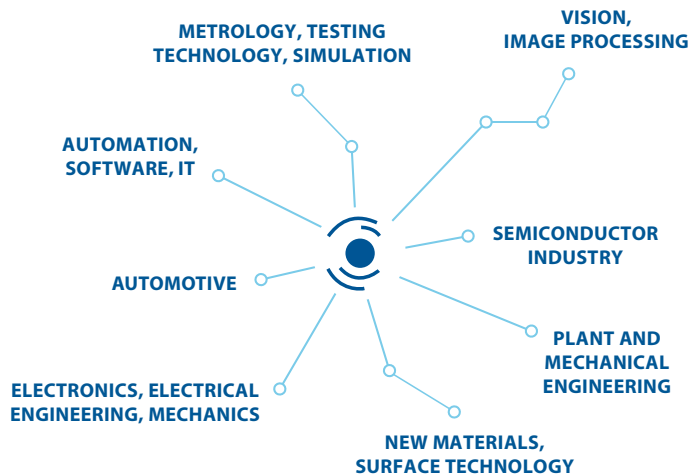

As a pioneer and supporting pillar of digitization, sensor technology provides impetus for all future technologies.

The mission of the sensor technology network is to secure and expand Bavaria's technology and market leadership worldwide.

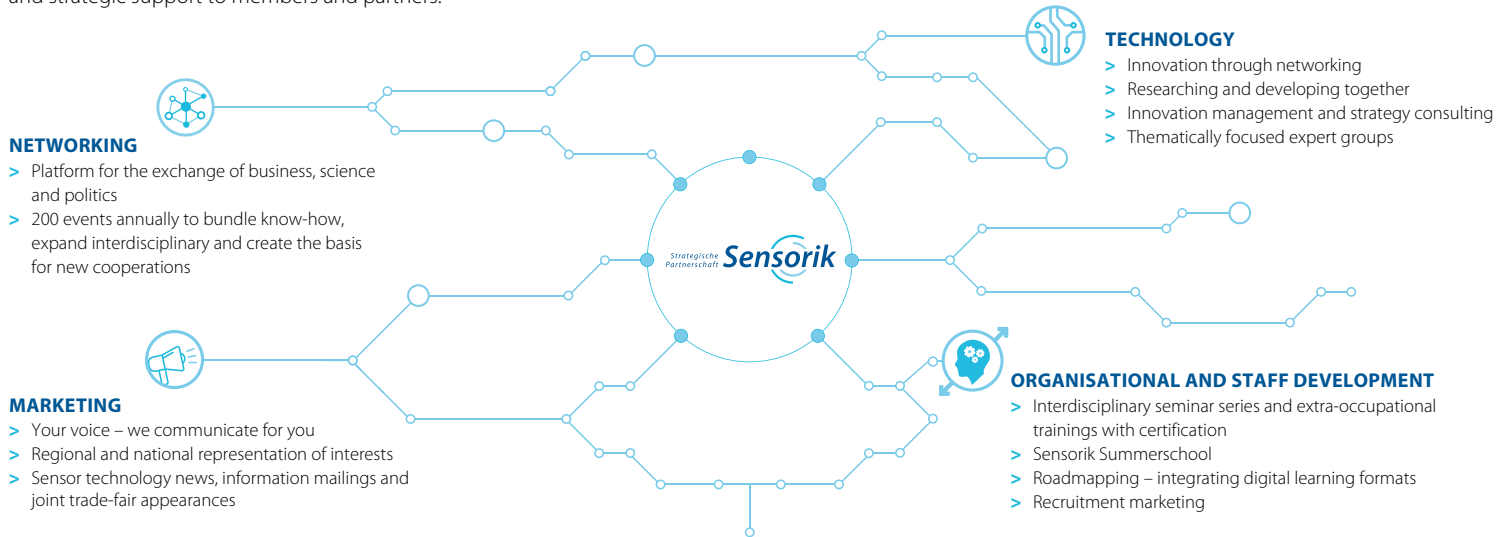

Our Members

The Bavarian sensor technology network is made up of over 80 leading, highly innovative companies and institutions worldwide. Experts from science, research and development as well as vocational training complement this high-tech expertise.

Your Benefit – Offers and Services in our Network

Since 2006, Strategische Partnerschaft Sensorik e.V. has bundled the existing sensor technology expertise on behalf of the Free State of Bavaria in order to sustainably strengthen the innovative power and future viability of companies and institutions. As a regional network for the industry, we provide operational and strategic support to members and partners.

Success Through Strategy and Strong Partners

Personal contact and trust characterise the cooperation in the sensor technology network. Long-term cooperation is the basis of our joint success.

In order to continuously expand our competence spectrum, we are happy to complement our network with new partners from business and science. Any organisation related to future technologies can become a member.

Our 100% subsidiary, Sensorik-Bayern GmbH, supports our team in technological issues. Whether as a development service provider, research partner or project coordinator – our high-tech experts help to implement innovative and intelligent sensor solutions across industries.
