

Senior Manager Data Analytics (f/m/div)*

Job description

Digital Transformation is the key for efficient and productive working today. Are you up for the task to drive this transformation within and across our front-end factories? Join our new team for data, analytics and digitalization. You will be developing solutions in interdisciplinary teams for a wide range of use cases, support our engineers and develop a strategy for digital transformation - all to maximize the value from data driven decisions. You like to take over the team lead, you are open for new solutions and would like to put your technical and analytical skills to work to help others? If this is you, what are you waiting for - apply now!

In your new role you will:

- **Coordination and prioritization of use cases**
 - in Production, in Technology, in Quality Management, in Facility Management and in Planning
 - for Preventive Maintenance, Image Classification, Business Process Analysis, Energy and Utilization Simulations
 - Disciplinary and functional management of the Data Analytics and Digitalization (DAD) department in the Regensburg front-end factory
- **Monitor and control relevant KPIs** for the DAD area and set site targets
- **Develop and manage the DAD roadmap for use cases and requirements** in alignment with local management and cluster strategy, including the inclusion of solutions from other sites
- **Optimize workflows, processes and methodologies in own area** of responsibility and initiate improvement projects
- **Coordination at the interfaces to various departments** within the Regensburg FE as well as to other FE locations and our internal customers
- **Negotiation and planning of resources, projects and budgets on site level**
- **Establishment of a strong network and definition of interfaces to various departments** at the site as well as to external partners incl. evaluation of potential partners

Profile

When facing a challenge your immediate reaction is to understand it in depth, structure it and automate the most important parts. You provide fast and efficient solution by easily abstracting even complex problems and transfer your learning from other applications to a new solution. You are an open communicator, enjoy working in an international surrounding and like to get to know experts from different areas to

At a glance

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

The Frontend (FE) cluster offers a broad range of manufacturing competence specialized in high-quality logic products. The portfolio represents Power, Bipolar, Sensor, Passive and Diode technologies as well as CMOS, RF-CMOS and embedded flash technologies. The manufacturing sites in Dresden, Kulim, Regensburg and Villach are committed to Operational Excellence with strong customer focus.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
